i10 4G

A smarter entrance. Connected over 4G.

Built-in 4G connects your entrance through the mobile network, without a fixed broadband connection. A 10-inch display and flush-mounted design complete the experience.

10” PORTRAIT DISPLAY

4G

BUILT-IN MOBILE CONNECTIVITY

No fixed broadband? Connect through the mobile network.

4G / ETHERNET / WiFi

10-inch display

800 × 1280 portrait resolution.

HD imaging and audio

2MP HD camera, IR detection camera, white LED, speaker and microphone.

Flush-mounted design

IP54 enclosure. Flush mount with box.

Connect over 4G. Power with 12V DC or PoE.

4G requires a micro SIM, an active data plan and suitable mobile coverage.

Built for connected properties

Built-in 4G, Ethernet and WiFi. Choose the connection that suits the property.

TECHNICAL SPECIFICATIONS

Display	10-inch; 800 × 1280 pixels
Connectivity	Built-in 4G, Ethernet and WiFi
Network port	10/100M Ethernet
Power supply	DC 12V / 3A or 48V PoE
Processor	2 × Cortex-A72 + 4 × Cortex-A53
Memory	2GB RAM; 8GB ROM
Camera	CMOS 2MP HD camera
IR camera / lighting	IR detection camera; white LED
Audio	Digital audio speaker and microphone
Ingress protection	IP54
Dimensions	174 × 393 × 33mm
Installation	Flush mount with box
Operating temperature	-15°C to +55°C

CONNECTIONS & INTERFACES

Micro SIM and microSD slots • USB • Door lock relay interface (COM / NO / NC) • Door-open detection and exit button • Alarm connection • Separate heating power input

4G installation: micro SIM, active data plan and suitable coverage required. Power the unit with DC 12V / 3A or 48V PoE. Check door lock power requirements separately.
